

Texperts

the experts in SAP technologies

SAP BASIS Support from Beginning to End

Texperts, Inc. is an SAP Partner in the Americas specializing in SAP BASIS. We offer services based on SAP Best Practices that support the client throughout the entire SAP lifecycle, either remotely or onsite. We assist with planning for pre-installation, including HW-sizing and overall SAP architecture. During implementation, we install SAP components and third party add-ons as well as assist the project team with the implementation. After Go-Live we work with the client to support them in all areas of administration, including maintenance and providing planning advice for the evolution of the SAP System Landscape.

Texperts is looking to the future by establishing strategic partnerships with VMware® and SAP to offer our clients SAP BASIS services for their SAP environment on VMware.
