Cloud/Hosting for SAP®

Not Just Another Hosting Provider

Texperts, Inc. is an SAP Certified Hosting Partner and a SAP Certified Cloud Provider, serving SAP clients, System Integrators and Consulting Firms in the Americas for over a decade. We are experts in VMware®-based hosting and cloud technology — an innovative, virtual approach that dramatically improves the efficiency and bottom line of your SAP Landscape.

Working directly with our clients, our dedicated, experienced teams get to know your business inside and out, allowing us to develop hosting strategies and make recommendations that maximize business benefit. There are no cookie-cutter solutions here — every project is handled on an individual basis based on client needs and business objectives. Additionally, our services are customizable and budget-conscious, based on predictable cost models with options such as flexible Pay-As-You-Go terms.

Cloud / Hosting Services for SAP

One of only 16 SAP Certified Hosting Partners in the U.S., Texperts specializes in SAP hosting on a dynamic hosting platform.

Sandbox Hosting: For companies that want to try before they buy, or just need a “Sandbox” for a flat monthly fee. Perfect for evaluating a new SAP product version, or testing a 3rd party product or for training purposes.

Development Hosting: Allows SAP clients to take advantage of an outsourced hosting approach with a predictable cost model to do configuration, customizing and/or coding to either enhance functionality or explore new features.

Integration Hosting: For ISV’s and SAP System Integrators to develop their own custom code and interfaces to integrate with SAP.

Implementation Hosting: Enables SAP clients and System Integrators to kick-start an SAP implementation project completely independent of their internal processes and to break free of infrastructure constraints.

Upgrade Hosting: Traditional SAP Upgrades and optional use of Texperts’ Utility Services featuring vUpgrade and vBreakFix-Path to accelerate SAP Upgrades and drastically reduce cost.

- Adaptive hosting platform
- Managed services
- Fast SAP system copies
- ITIL based Service Delivery

“I’ve worked with many other hosting providers, but I’ve never had an engagement that was as smooth as the one with Texperts. We were very pleased with the level of support and technical expertise, as well as the functionality of the VMware virtualization technology. It was truly a successful project in every respect.”
