

SAP Basis Consultant – Vacancy

Date Posted: November 22, 2010

Salary: Salary is dependent on SAP Basis experience (between \$60,000 - \$95,000 per annum)

Benefits: Health Insurance
Vacation and Sick Leave
Life Insurance and Disability Insurance
Laptop and cell phone

Position Summary:

SAP Basis Consultant/Administrator: Preferably you will have the following experience:

- Strong SAP Basis experience
- SAP implementation, upgrade and support experience
- SAP migration and/or system copy experience
- Experience with production support with core SAP modules (i.e. SAP FICO, SAP CRM, SAP BW etc)
- Experience with supporting an SAP implementation project(s)
- Experience in the following new SAP technologies with dual stack (ABAP/Java) would be a bonus:
 - SAP Netweaver
 - SAP Enterprise Portal
 - SAP CRM
 - SAP BW
 - SAP XI
- Virtualization experience, especially with VMware ESX software will be a big plus

This is a fantastic opportunity for you to work with an exciting small SAP Technology service provider that is well respected in the SAP community and develop your SAP skills in a dynamic team environment.

Minimum Requirements of Position:

- Bachelors degree or higher in Computer Science
- Minimum 5 years working with SAP BASIS
- Live within the greater Atlanta area
- Overall understanding of technical architecture knowledge
- General understanding of the full spectrum of hardware and software Infrastructure including the underlying dependencies and implications.
- Proficient in a DBMS product (Preferably MS SQL Server, MaxDB or Oracle).

the experts in SAP technologies

November 25, 2010

- Experienced in systems installations, migrations and systems copies. Intermediate UNIX skills including understanding scripting.
- Familiarity of the SAP Upgrade Roadmap.
- Familiarity with commonly used databases and OS environments.
- Deep Knowledge of the SAP business suite.
- Familiarity with the installation and configuration of SAP.
- Familiarity with SAP change releases, SAP notes, service packs and Solution Manager.
- Understanding of the technical requirements of an upgrade (functions of SAP NetWeaver, WebAS, Unicode).
