vDocMgmtSM

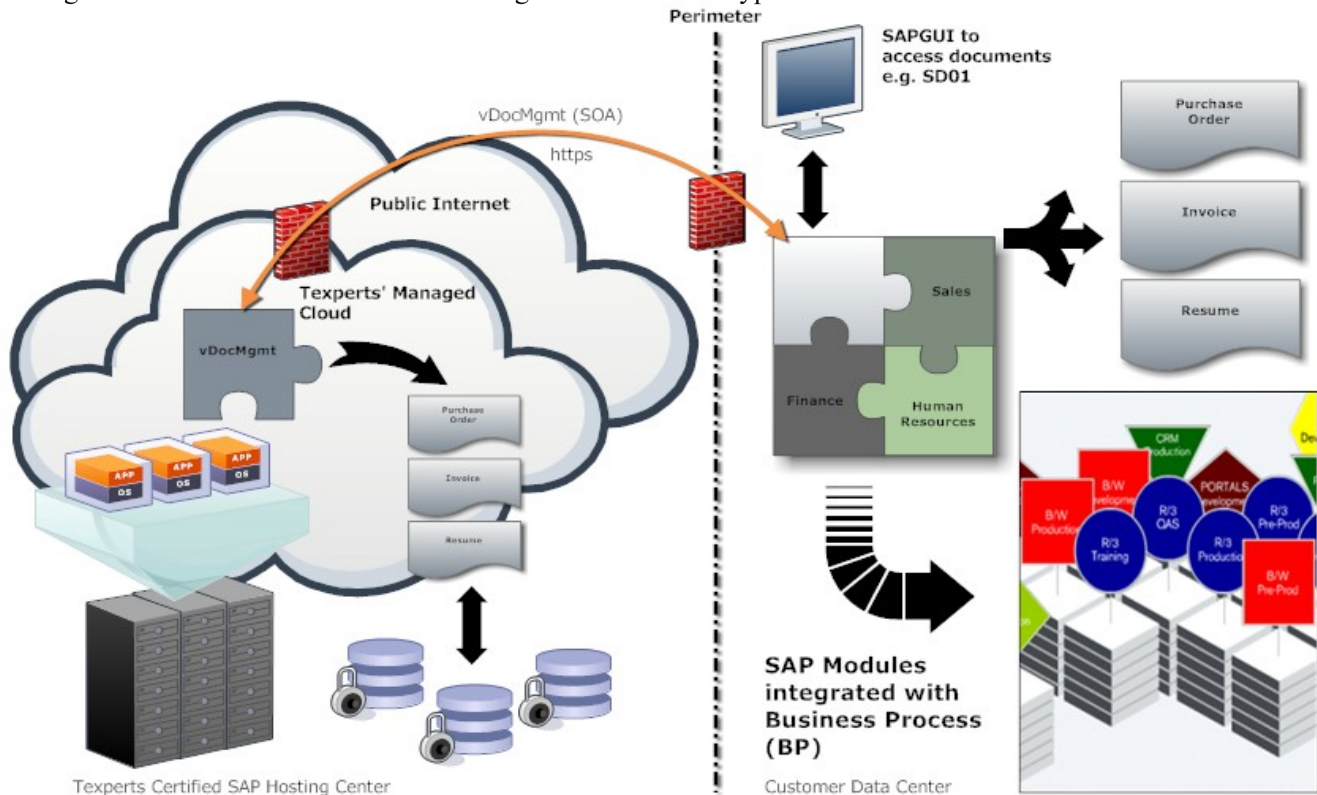

Leverage the Cloud for Document Management

vDocMgmt, utilizes a managed Cloud-based service model offering a SAP-compliant Document Management service for integration with your SAP environment. Our flexible service scales dynamically based on consumption to support your business needs. This non-intrusive cloud service is based on the SAP ArchiveLink interface and does not require any business process customization to transparently manage documents within SAP transactions e.g. sales order. vDocMgmt provides secure communication with the SAP system via a certificate-based https connection. With vDocMgmt there is no need for the acquisition and capital investment for an internal document management system and avoids additional costs for hardware, software licenses, maintenance or support.

All services are based on SAP-certified software providing compliance with legal standards for document management and encryption.

Key Benefits

- SOA-oriented cloud service
- SAP Certified and Compliant
- Dramatically reduces document management cost
- Operating Expense vs. Capital Expense
- Subscription-based service
- 24x7 Operation
- Scales up and down to adjust to your business needs
- No hardware and software costs
- Compliant with legal standards for document management and encryption
- Non-intrusive at client data center
